CALL HIM

WHAT IS BABY JACKPOT

Baby Jackpot (\$POT) is a meme coin designed to bring its holders big profits! Profits are gained in several different ways, but the primary method is through a revolutionary fully automated Jackpot DApp which features the "Cherry Bomb".

Jackpot profits are earned by winning a jackpot, receiving a jackpot share or by taking profits after the Cherry Bomb has gone off. The Cherry Bomb is a buyback and burn dynamic feature that will create major FOMO!

The next way to earn profits is by simply hodling \$POT AND SendIT OUR AIRDROPPER WILL SEND YOU EVEN MORE \$POT just for hodling. Another option for making money with \$POT is through "Reflections" which are ALSO paid automatically just for holding \$POT. Finally, you can earn \$BNB by simply registering your NFT's in our new proprietary NFT Airdrop DApp called NFT SendIT. With multiple ways to earn profits, \$POT is well worth considering as an investment option!

HOW DOES

"THE JACKPOT" WORK?

The Jackpot does three things. First

50% of the jackpot balance will be awarded to every jackpot winner. A jackpot occurs whenever there are no qualifying purchases for ten minutes OR SO (starting when that jackpot has reached its minimum starting point and has had at least one qualifying purchase within that time). All jackpots will be paid in \$BNB. Secondly, Baby Jackpot has the Cherry Bomb, a built-in automatic buyback and burn feature that will create, "THE ULTIMATE FOMO." Finally, anyone who participated in the jackpot receives a jackpot share based on both their participation amount and on the number of participants.

3%

of every \$POT buy/sell goes to purchasing any BEP20 token that we choose. These purchased tokens are then given back to all \$POT holders in a form of rewards.

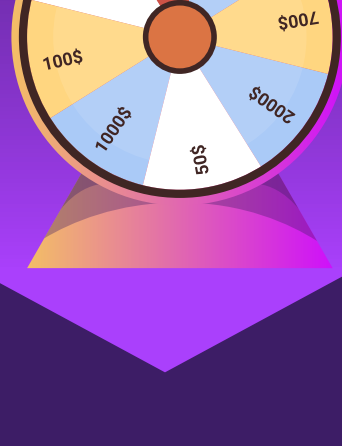

As the jackpot grows with every \$POT transaction, the jackpot will fill to the current set target dollar amount for the minimum starting jackpot. When the set target, AKA "The Starting Jackpot" amount is reached, the 10-minute timer begins. If no one purchases \$POT in those ten minutes the last person who bought \$POT wins the jackpot! However, if someone does purchase at least 0.1 \$BNB worth of \$POT once the timer has begun, the timer restarts and the next round of 10 minutes begins.

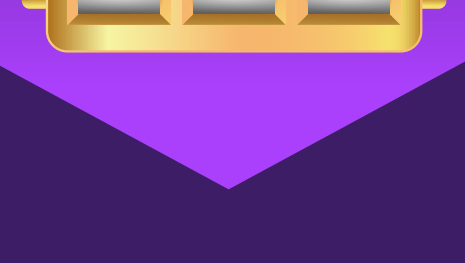

WHAT IS A CHERRYBOMB?

The Cherrybomb is an exclusive new feature completely unique to \$POT - so let's explain it! In basic terms, the Cherrybomb is an automated buyback and burn feature.

Once the \$BNB jackpot reaches its current Cherrybomb preset target amount (the first Cherrybomb is set at 10 BNB) the Cherrybomb is ignited! Once the Cherrybomb feature "explodes," **50%** of the jackpot will be bought back and burned!

The Cherrybomb feature is designed and intended to bring about large and rapid price increases. The Cherrybomb targets have been set to low, easily attainable amounts on purpose so that there will be constant FOMO building with the frequent buybacks, burns and price spikes. Frequent buybacks and burns will increase the \$POT price thus benefiting all holders. One doesn't need to participate in the jackpots to benefit from the Cherrybomb because all holders can take profits when the price goes up!

JACKPOT BREAKDOWN

When someone wins the jackpot, by being the last person (within 10 minutes) to buy at least 0.1 \$BNB worth of \$POT, the winner receives 50% of the jackpot (minus gas fees*) with the other 50% being split as follows:

25%

goes to the next jackpot (aka "Starting Jackpot" amount)

25%

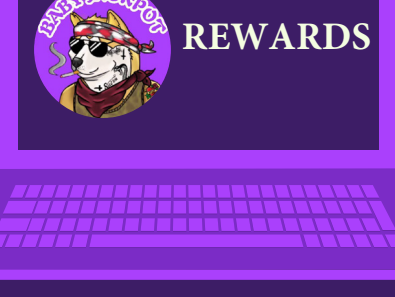

is distributed as a "Jackpot Share" to the participants who purchased \$POT during the round that has just finished. AND EVERYONE GETS TO SHARE IT!

The more \$POT someone buys, the more of the Jackpot Share they will receive. This way, everyone's a winner with Baby JackPOT!

**Please note all gas fees are automatically deducted from winnings as part of the smart contract when the jackpot is released.*

REWARDS FOR HOLDING \$POT

Rewards are BEP20 token REWARDS that get paid out automatically just for holding \$POT. Reflections are paid out in any BEP20 token we choose, such as CAKE, WBTC, WETH WXP and so on. The process is super user friendly as each reward token gets airdropped USING OUR SendIT TECHNOLOGY directly into your wallet 24/7! The BEP20 reflection tokens will be changed PERIODICALLY giving you a very healthy token variety in your Defi portfolio. Each TTT (TOKEN THIS TIME) will be decided by either our team or by votes from our VIP token holders (\$5K holdings minimum).

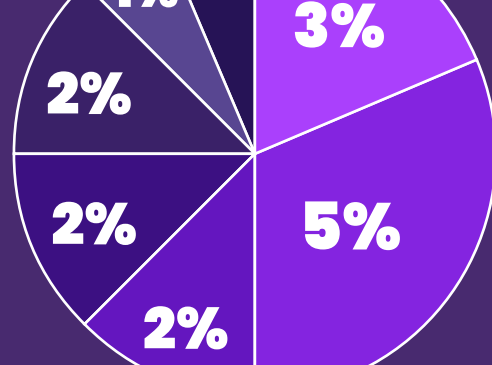

\$POT REWARDS

In addition to the amazing benefits above, \$POT also has a built-in DApp where HODLers will be rewarded \$POT TOKENs 24/7!

WHAT ARE THE \$POT TOKENOMICS?

For every transaction a 16% tax is applied. The 16% buy/sell tax break-down is as follows:

- BEP20 Reflections
- Jackpot
- NFT Rewards Pool
- Dev
- Team
- Liquidity
- Marketing

VIP HOLDERS (\$5K OF \$POT OR MORE HELD)

VIP Holders will be able to vote on the next token that will be rewarded to token holders, this will be done regularly in the private VIP Telegram chat that will be set up exclusively for our largest holders.
